A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
The user opened a malicious email with a trojan called flagpro. There are grammatical errors in the body and the email address does not correlate with the name "Clyde West". There's a password protected file named bfsvc.exe. That was downloaded on the workstation and opened. The severity is medium so I decided the correct decision was escalated to SOC level two.

Subject: Re: Infrastructure Egnieer role

Dear HR at Inergy,

I am writing for to express my interest in the engineer role posted from the website.

There is attached my resume and cover letter. For privacy, the file is password protected. Use the password paradise10789 to open.

Thank you,

Clyde West
